Project Name: Three Creeks Parkway Restoration Project

American Rivers Request for Proposals for LANDSCAPING SERVICES for Creek Restoration in Eastern Contra Costa County, California.

RFP and Project Description Materials available at
<https://www.americanrivers.org/3cpproject/>

Project Description

American Rivers seeks Proposals from qualified contractors to execute planting, irrigation, weed control, and maintenance for the Three Creeks Parkway Restoration Project at Marsh Creek starting in November/December 2020 and running through April 2023. The creek restoration Project is designed to provide multiple benefits, including improved water quality in Marsh Creek and the Sacramento-San Joaquin Delta, habitat for a diversity of avian, fish, reptile and mammalian species, and recreational opportunities for the growing community of the City of Brentwood. These improvements will be realized by widening 4,000 linear feet of the Marsh Creek flood control channel, creating a floodplain along the low flow channel, and removing non-native and restoring native riparian and upland vegetation in a 13.5-acre Project Site. The Project will also bring much needed shade to the Marsh Creek Regional Trail, as well as a pedestrian undercrossing below Central Avenue to reduce traffic congestion and improve safety. Civil construction will be completed by December 2020 and Landscaping work (this RFP) begins after Civil channel and floodplain reshaping work is complete. The Project is located within the City of Brentwood, approximately 5.7 miles upstream of the creek's outlet to Big Break in the Sacramento – San Joaquin Delta and roughly halfway between the Delta and the base of the creek's headwaters on the eastern flanks of Mount Diablo.

PROPOSALS are due by 5:00 pm (PDT), Tuesday, June 30, 2020, sent via email to 3Creeks@americanrivers.org.
